Cardinal Shrub

The Shrub of the Century

FS 150 Cardinal Shrub (Weigela Vanicek). We believe this to be the finest red-flowering shrub in America. In May-June every plant is simply covered from top to bottom with hundreds and hundreds of lovely rosy-red flowers. They are trumpet-shaped, 1 to 1 1/4 inches across. After this first big display, there are some scattering blooms throughout the season. If you cut off sprays of flowers and use them for bouquets, the plant will flower even more freely than if you left them on.

At Hamburg, the Cardinal Shrub has withstood 15 below zero without injury. It is so easy to grow, not particular as to soil. Thrives in full sun or part shade. It makes a shapely bush 5 to 6 feet tall with excellent foliage. Used as an untrimmed hedge, it will be the sensation of your neighborhood.

Look over your yard, whether large or small. You will find a spot where it will help make your home more beautiful. Plants set out this fall will *Bloom Next Season*. We ship them to you **POSTPAID**, trimmed ready for planting, at the proper planting time for your locality.

HARDY HEDGES

Bridal Wreath Hedge

HANDSOME *Bridal Wreath*

FH 3 Bridal Wreath (*Spirea Van Houtte*)—This photograph shows the beauty of Bridal Wreath, America's most popular and widely planted untrimmed flowering hedge. Millions of small white blooms cover the gracefully arching branches, every spring, without fail. Requires no special care and lasts a lifetime. Perfectly hardy, grows everywhere, in full sun or partial shade. You see it all over America and everywhere it is attractive and thriving. Makes a marvelous hedge or screen 5 to 6 feet tall. Plant 2 to 3 feet apart.

AMAZING ROSA *Multiflora*

FH 7 Rosa Multiflora Japonica—The conservation people recommend this for a living hedge where you have plenty of room, for erosion control and an excellent wild life refuge. However, we do not advise using it on small city lots because when not trimmed it makes a bushy, thorny plant 6 to 8 feet tall and almost as wide. Has white flowers in spring followed by red fruits which the birds like. Hardy up to central Iowa. We have seen many fine untrimmed hedges on farms. Plant 18 to 24 inches apart.

CLAVEY'S *Dwarf Honeysuckle*

A PERFECT HEDGE IN JUST ONE YEAR

FH 52 Clavey's Dwarf Honeysuckle—is particularly valuable as a low growing hedge. Plant them 18 inches apart this fall and NEXT SUMMER YOU WILL HAVE A HEDGE. It makes a perfect hedge 3 feet tall and 3 feet wide that never needs to be trimmed. Or if you want a lower, narrower hedge, trim it just once a year at whatever height you wish. The picture shows what a bushy, attractive hedge it will make. In the spring it has small creamy flowers followed by red berries. Completely hardy and easy to grow either in full sun or partial shade.

HARDY *Privet* HEDGE

FH 2 Hardy Russian Privet (*Amoor River North*)—Is by far the most popular hardy trimmed hedge in the northern states. It makes a permanent hedge, lasting for generations. Not only adds beauty, it also protects your yard especially if you have a corner lot. It is fine for a division line between yards. Can be trimmed to any desired height, making a thick, dense hedge, without thorns, right down to the ground. Requires trimming only twice during the summer. But if you trim it 3 or 4 times, it becomes more dense and bushy. Leaves are rich, dark green and hang on until very late fall. Plant 1 foot apart.

CHINESE ELM

FH 1 Chinese Elm—Is America's fastest growing hedge, making a good showing in just a few months. It is the first to leaf out in the spring and one of the last to shed in the fall. You can trim to any desired height from 3 to 10 feet, as a hedge or tall screen. The more you trim it the more dense and compact it becomes. We recommend that after planting, you cut off nearly all of the top, leaving only 5 to 6 inches above the ground. This will make a bushier, more dense hedge. Plant 8 inches apart.

F 93 Bierschmidt—This high quality pear originated in Iowa. It is hardier than Bartlett and blight resistant. A heavy bearer, ripens a few days after Bartlett. Fruit is large, yellow with blush and very delicious flavor.

F 96 Seckel—Called the Sugar Pear because of its sweet, delicious flavor. Fruit is not large but the highest quality. Ripens in late summer. Bears young and heavily. Blight resistant.

F 88 New Cope's Seedless Pear—A New Fruit Sensation. A Pear That Has No Seeds and No Core. In addition, it has everything else that you could ask for in a pear; great producer, excellent quality, size, beauty, vigor. The flesh is tender and sweet, juicy and delicious.

F 92 Kieffer—The most widely planted winter Pear. A healthy, hardy and vigorous grower which bears young, heavily and regularly. The fruit is large and fills countless jars every season. ✧ **F 81 Montmorency**—This is the most popular of all cherries, largely because it is the best of all for canning. And it tastes mighty good to eat fresh right off the tree, especially when fully-ripened, home-grown. The fruit is large, firm, very fine flavor. Ripens about 10 days after Early Richmond. Bears heavily and regularly. Be sure you have at least one tree in your yard. If you have room for but one cherry, then we recommend this. This is the virus-free Gilbert Strain. Self-pollenizing.

✧ **F 85 Meteor**—A new cherry from the Minnesota Experimental Station. The fruit is very large, rich red and excellent flavor. Good for eating fresh, for pies, cobblers, preserves and freezing. Currants FOR JELLY & JAM

FA 148 Red Lake—This new variety is rapidly replacing the older kinds. We think that it is the most productive, the best quality of all currants. The berries are very large, the clusters are long and filled out right to the end. The color is a bright glossy red and makes the most beautiful and finest flavored jelly. They grow in ordinary garden soil. Plant them 3 to 4 feet apart. Please read NOTICE BELOW. They bear regularly. Our big 2-Year No. 1 plants will start bearing next year after planting.

Each 65c, 3 for \$1.65, Postpaid

IMPORTANT NOTICE

On account of federal regulations we ship Currants and Gooseberries only to the following states—Alabama, Arizona, Arkansas, Colorado, Florida, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Mississippi, Missouri, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, South Carolina, South Dakota, Texas, Utah and Wyoming.

Blueberries, GROW THEM YOURSELF

We have been fruiting these for several years. When we planted them we mixed about $\frac{1}{3}$ Peat Moss with the soil. Or you can mix a few handfuls of regular sulphur with the soil when planting. You can get sulphur at your drug store. These are the popular cultivated Blueberries with large berries. Eat them fresh or for pies and wonderful for freezing. The bushes themselves are attractive with white flowers in the spring and waxy green foliage which colors red in the fall. Many folks plant them in their front yard with the shrubs. In the fall, their red color is simply gorgeous. We sell only the three varieties together because they must be planted in a cluster, 4 to 6 feet apart, so they can cross-pollinize. We have selected the 3 most popular varieties. Big, branched 3-year-old plants, almost 2-feet tall that will start bearing next year after planting.

LARGER FRUIT • EASY TO PICK • BEAR YOUNG

Inter-State is doing more basic research in the production of Dwarf Fruit Trees than any other nursery in America. These Dwarf Fruit Trees are becoming tremendously popular simply because their small size makes it possible for millions now to grow their own delicious home-grown fruit even if their yard is small. Orchardists are planting them because they bear younger, often just a year or two after planting, are easy to take care of, and the fruit is larger.

DWARF PEAR TREES

BEAUTIFUL *Trees* FOR YOUR HOME

CRIMSON KING MAPLE

FT 7 Crimson King Maple (P.P. 735). Truly a King of the ornamental trees, it is distinctive, colorful, captivating. Far superior to Schwedler's Purple Maple. The foliage is a deep maroon-purple from the time it leafs out until the leaves fall. This rich color adds an exhilarating contrast to the prevalent greens. Fine for city planting, not harmed by smoke, gasses, dust. It will live for many generations, becoming more attractive each passing year. We have sold many thousands since we first offered it, spring of 1949. We are now receiving enthusiastic letters of praise. The trees we send you are one year old top, 3 year old roots. They are especially fine specimens this fall. They will start branching the first summer and every leaf, every inch of growth will be a delight. Perfectly hardy and easy to grow. **BE SURE TO WATER YOUR SHADE TREES THOROUGHLY EVERY FALL.**

The Sunshine Shrub

THE *Sunshine* SHRUB

FS 48 *Hypericum, Kalmianum*. The picture at left shows the neat, compact form of this grand shrub. It makes a perfect mound, 2 to 3 feet tall and 3 feet wide, very dense and bushy. We call it the "Sunshine Shrub" because of the cheery brightness it brings to home plantings. The bright, golden-yellow flowers, shown in the inset at left, are produced all summer long. The bluish-green foliage is attractive in itself. It makes a perfect single specimen, a wonderful border or low hedge and is attractive in a group planting. Very easy to grow, not particular as to soil, grows in full sun or part shade, even in quite dry places where most shrubs will not live. In severe winters the tops will die down. Next spring just cut off the old tops and new growth will come up from the roots. We believe this to be one of the very best flowering shrubs. Find a place in your yard where you can plant it this fall. You will be delighted at the beauty it will add to your home next summer. POSTPAID.
